KEY FEATURES

STABLE & EASY TO USE

Boasting three fat tires and a low step-through design, the Fat Tire Trike guarantees remarkable stability and offers an easy on-and-off experience. Perfect for riders of all levels, the fat tires contribute to a worry-free and smooth journey, while the low step-through ensures accessibility for all.

ADVANCED RIDING TECHNOLOGY

The Fat Tire Trike is not just about stability and ease of use; it's packed with advanced riding features to enhance your journey including an illuminated color display offers easy control of our proprietary propulsion software that delivers the elevated riding experience signature to Pedego.

A LEGACY OF QUALITY & PEACE OF MIND

Delivered fully assembled and ready for pickup at one of our 200 dealers, the Fat Tire Trike boasts quality components and materials that exceed industry standards. As part of the Pedego brand, the Trike inherits a legacy of excellence, earning a remarkable 4.9 out of 5-star consumer satisfaction rating from thousands of riders.

SMALL DETAILS MAKE A BIG DIFFERENCE

SAFETY MATTERS MOST - UL2849

SGS Certification to the UL 2849 standard goes beyond assessing just the battery, employing a comprehensive system-oriented safety approach to mitigate risks effectively. This certification involves rigorous testing of each significant component within the electric powertrain, as well as evaluating the system as a whole. By adhering to the highest safety standards, it aims to minimize potential risks and instill a sense of confidence and peace of mind for the owner.

The evaluation encompasses the entire electric powertrain and system, ensuring the thorough examination of individual components for optimal safety assurance. In addition to the certification, Pedego goes even further using LG Cells and resin potting on the battery components to add an additional level of safety.
